

Clinical Medication Policy

I will use any medication prescribed only within the parameters given by my providers at Lewiston Orthopaedics.

I will keep regularly scheduled appointments with my provider, and refill requests will not be honored without an appointment with my provider.

I understand the providers of Lewiston Orthopaedics do not prescribe narcotic pain medication (controlled substances) prior to surgery except with acute injuries.

I understand that refill requests after 12:00 p.m. on Friday will be filled on Monday. All refill requests for prescriptions require 24-48 hours to complete.

I understand that the on-call doctor will not refill any medications after hours or over the weekend with the exception of patients within ten (10) days of surgery.

I understand my prescriptions for narcotic pain medication (controlled substances) will be discontinued within 3-6 weeks after surgery.

I will not receive replacement for lost or stolen medication.
